Wooden box

All rocks are presented in bright wooden boxes in the shelf so end customers have a good overview about the rock range. The rocks can be taken out of the box and viewed directly since the boxes are open at the front.

Setup box

A rectangular setup box allowing to test the arrangement of rocks and roots is located on the shelf. The box is equipped with two sliders (horizontal and vertical) as well as sand. It simplifies a buying decision for customers and provides the opportunity for interactive counseling at the shelf.
