

sera Phyto med Mycozid

The herbal water treatment sera Phyto med Mycozid contains highly effective thyme oil from *Thymus vulgaris* L., *Thymus zygis* L. as an effective agent, which makes it effective against external fungi such *Saprolegnia* sp., *Achlya* sp. in early stages as well as spawn fungus. Furthermore it can be used to accompany a therapy in case of injuries or bacterial inflammations as to prevent a secondary infection by fungi.

It is suitable for ornamental fish in aquariums and in garden ponds, however in this case best in a quarantine tank.

Dosage: 1 ml to 40 liters of aquariumwater

Unit: 30 ml (range: 300 – 400 l)

100 ml (range: 1.000 – 1.300 l)
